Head to the Office

with WELL Health-Safety Rating™

We trust the experts.

Our Return-to-Work Cleaning plan meets the requirements of the 600+ experts of public health behind the International Well Building Institute's WELL Health-Safety Rating. It aligns with recommendations by the Centers for Disease Control and Prevention (CDC), the World Health Organization (WHO), and Green Seal.

There's a lot of planning behind each gleaming surface in our building. We research every cleaning product used for its human health and environmental impacts. If it meets our standards, we make sure products are labelled and stored correctly to maintain a safe working environment for our cleaning team. Finally, we make sure our people attend annual training on product use and proper Personal Protective Equipment (PPE) for each task.

Pandemic protocols

We've been here each step of the way during the COVID-19 pandemic and prioritize our cleaning protocols accordingly. We follow the latest guidance from the CDC, WHO, and the Public Health Agency of Canada (PHAC) when it comes to disinfection and cleaning best practices. As the focus shifts on transmission data, so too does our cleaning strategy.

You can rely on us to keep your safety top of mind when it comes to providing clean spaces.
